**Formsteel™**

**WORLD CLASS STEEL BUILDINGS SINCE 1972**

**AERO BUILD**

# PROTECT YOUR PLANE WITH AN AERO BUILD HANGER.

The difference between something good and something great is attention to detail. We've earned our reputation by doing just that - designing and manufacturing AEROBUILD hangars for maximum strength and durability to protect your investment.

# AERO BUILD By Formsteel™

- UP TO 75M SPAN WITH A CENTRE COLUMN**
- UP TO 15M STUD HEIGHT**
- UP TO 500 TONNES OF STRENGTH PER CONNECTION.**
- UNIQUE STIFFENING SYSTEM**
- LESS CARBON FOOTPRINT THAN STRUCTURAL STEEL**

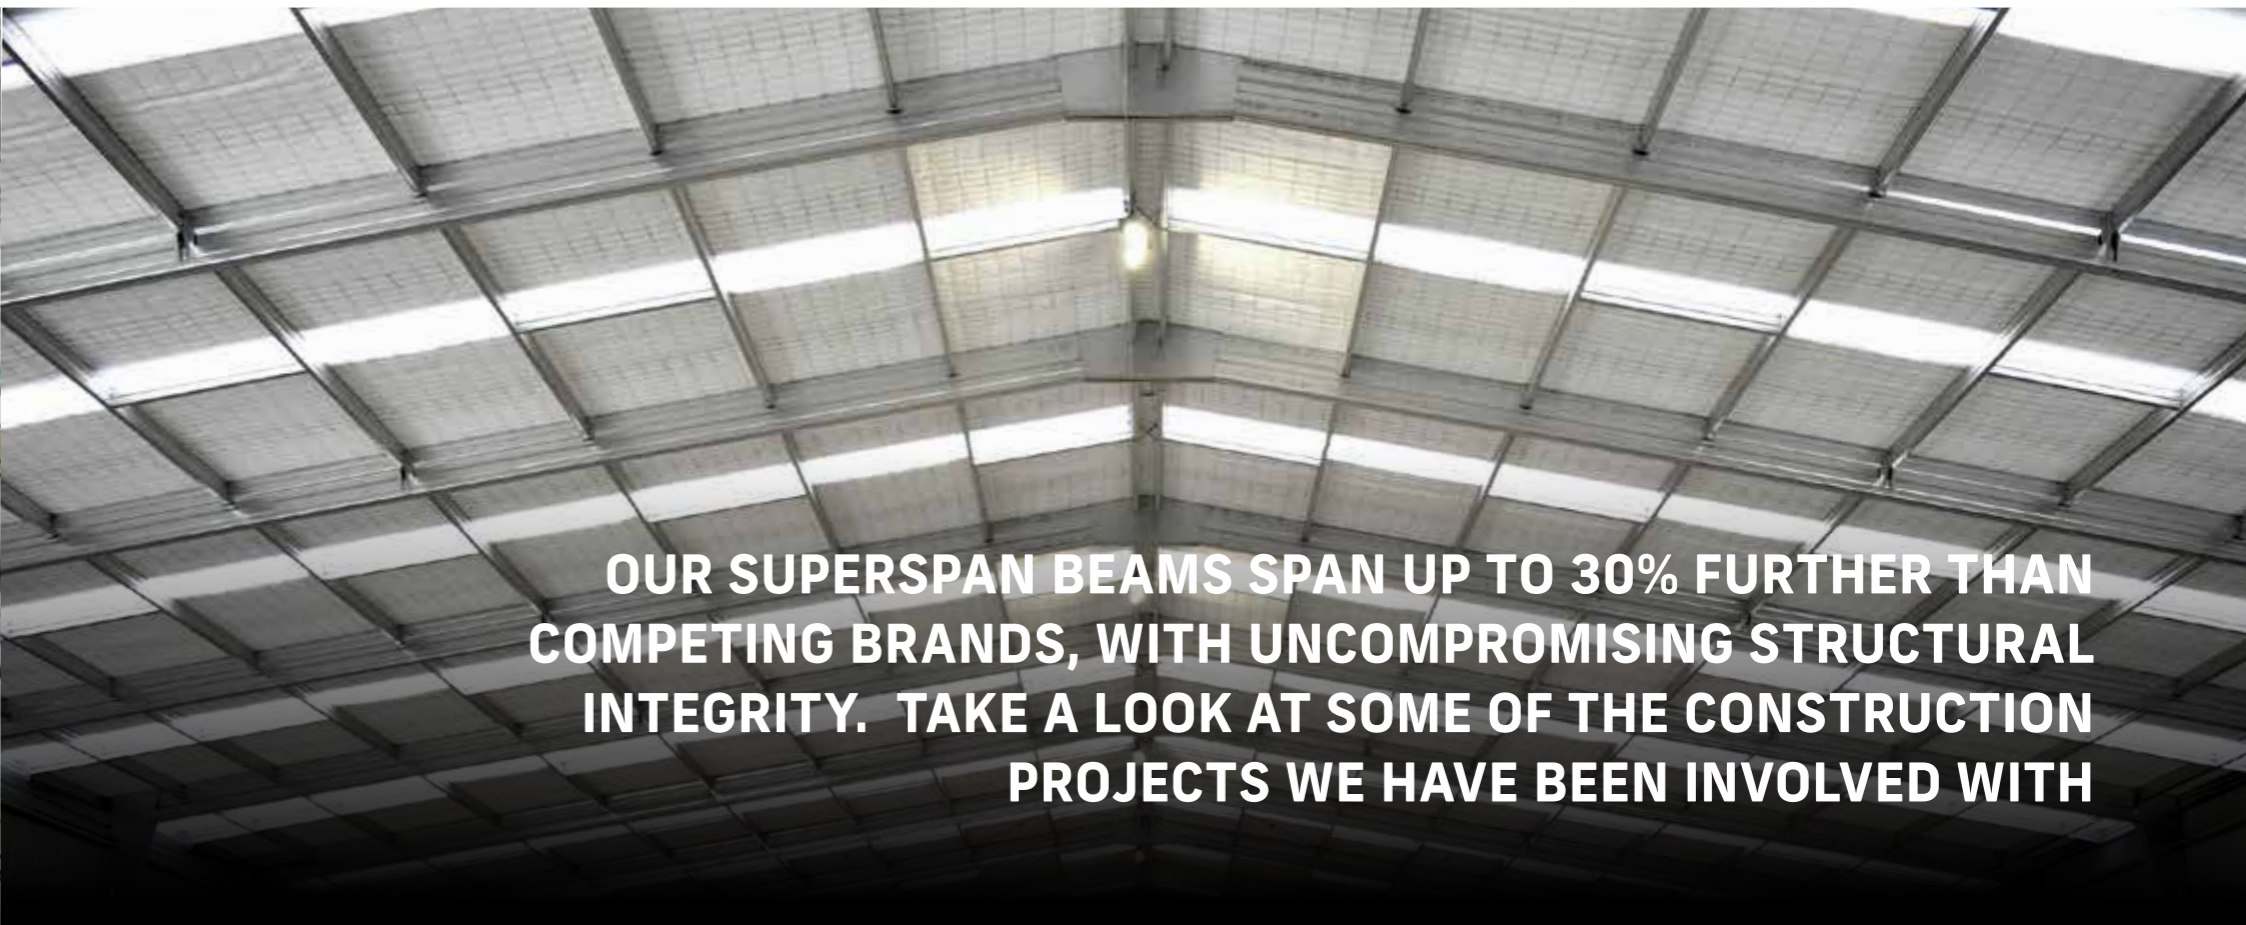

Our structures offer a fast, reliable and superior build. They are New Zealand condition tested and built to ensure maximum durability and longevity, so you get optimum return on your investment. With NZ's most significant clear-span buildings, we manufacture high tensile super span beams, giving us the flexibility to engineer our structures to virtually any size.

This makes AEROBUILD the perfect choice for storing commercial, personal or other aircraft. Formsteel's unique super strength TEK screws have over 1 tonne of shear strength each, allowing us to supply with

confidence our buildings globally where they have to withstand winds of up to 300km/hr. We can guarantee maximum structural durability for UP TO 50 years while maintaining a cost-effective price for your project.

Our in-house team of experts in designing steel aircraft hangars are on hand to help you get your project off the ground. The process is a collaboration between you and our experienced team, and that's where the detail comes in. We like to understand precisely how you'll be using your aircraft hangar, the location on your property, and your ideas for interior and exterior design of the building. We'll analyse the site of the proposed plan to ensure that it meets building requirements for wind and snow loads of your area.

Delivered on time, made to detailed specifications and built to last Formsteel are the experts in large scale steel structures.

**OUR SUPERSPAN BEAMS SPAN UP TO 30% FURTHER THAN  
COMPETING BRANDS, WITH UNCOMPROMISING STRUCTURAL  
INTEGRITY. TAKE A LOOK AT SOME OF THE CONSTRUCTION  
PROJECTS WE HAVE BEEN INVOLVED WITH**
