

**WORLD CLASS BUILDINGS SINCE 1972**

**FORM CLAD**

# TRUSTED DURABILITY FROM WALL TO ROOF WITH FORM CLAD

Form Clad by Formsteel® profile is suitable for all types of applications - residential, commercial and industrial with pitched or near flat roofs. It can also be used for walls, fascias, spandrel cladding, fences and screens. Form Clad is available throughout New Zealand and can be supplied with all the necessary fasteners and accessories.

# FORM CLAD By Formsteel™

**PURLINDEK LONG RUN ROOFING AND CLADDING SYSTEM**  
**EASY CONSTRUCTION**  
**PREMIUM GRADE MATERIALS & BUILT TO LAST**

Innovation & integration helps make for inspiration. FORMCLAD dual purpose, single-skin wall and roof system delivers the maximum design flexibility you have been looking for. Vertical or horizontal surfaces, no longer are you restricted to selecting a separate wall and roofing panel. Engineered for New Zealand conditions, and ideal for more extreme environments, FORMCLAD allows you to innovate and integrate a new level of creativity and durability into your building design.

FORMCLAD steel base with a multi-coating paint system applied has a base metal thickness of 0.40 mm or 0.55 mm. FORMCLAD profiles are

suitable for all types of applications across residential, commercial and industrial with pitched or near flat roofs. Doesn't just stop at buildings, also suitable for fascias, spandrel cladding, fences and screens, the options are endless.

FORMCLAD is extremely strong, lightweight, durable and low maintenance product. It comes pre-painted in a curated range of the most popular colours by FORMCOLOUR, and backed up with 25 Year paint warranty too. Whatever style or size of building you require, we're here to add the innovation and technical expertise that will deliver the value, versatility & strength for your project. Engineering outstanding cladding excellence

**FORMCLAD IS EXTREMELY STRONG,  
LIGHTWEIGHT, DURABLE AND LOW  
MAINTENANCE PRODUCT.**

**INNOVATE AND INTEGRATE A NEW LEVEL  
OF CREATIVITY AND DURABILITY INTO  
YOUR BUILDING DESIGN.**

## **FREIGHTING**

We send freight across NZ & worldwide at reasonable prices.

## **HANDLING**

Framing can be carried around the site by 1 or 2 men in a lot of instances.

## **LIFTING**

Rafters and frames can be lifted into place using smaller equipment - e.g. telehandler, scissor lifts or smaller cranes. Less equipment, less hire time.

## **POSITIONING**

Lighter framing members are easier to get in place for attaching.

## **FULLY GALVANISED**

All framing is fully galvanized steel finish, requiring no painting on-site (unless extreme conditions).

## **HIGH TENSILE STEEL**

Lighter gauge members, but superior strength with high-grade tensile steel.

## **FASTENING/CONNECTION**

Our unique plate connection has had 100% success rate and no failures. Plates are pre-drilled for accuracy. 1-tonne sheer strength per TEK screw.

## **PRICE**

Our patented profiles give greater strength using less steel. Maximise quality & minimise price.
