AZ-FORM

**CHOOSE FROM A SELECTION OF THE MOST POPULAR COLOURS
25 YEAR PAINT PROTECTION WARRANTY
COLOUR PALETTES REFLECTIVE OF THE UNIQUE NZ LANDSCAPE
PREMIUM COATING ENGINEERED TO LAST**

Our paint coatings carry the Environmental Choice New Zealand (ECNZ) ecolabel, making them eligible for maximum points under the Green Star MAT-8 Steel credit and Homestar MAT-1 Sustainable Materials credit.

FORMCOLOUR is designed specifically for New Zealand's climate - higher atmospheric salt conditions, wind, rain and ice. Backed with a 25 Year paint warranty, our paint system reduces the need for expensive repairs and ongoing maintenance contracts, giving you peace of mind for the long term.

FORMCOLOUR comes in a curated range of the most popular shades that stand the test of time. Need other colour options? We have different colours available upon request also. And if you are constructing a building to franchise brand guidelines, we'll work with you on any colour specifications to get your project completed to brief.

Choose Formsteel and get the innovation you deserve throughout the entire design and construction process, backed up with a 50-year structural & 25-year paint warranty. What are you waiting for!

**FORM COLOUR IS DESIGNED SPECIFICALLY FOR
NEW ZEALAND'S CLIMATE**

A close-up photograph of a metal roof structure. The roof consists of several parallel metal ridges. A copper lightning rod is mounted along the ridges, secured with screws. In the foreground, a corrugated metal vent pipe is visible, showing its characteristic ridged pattern. The lighting is bright, creating strong shadows and highlights on the metal surfaces.

**BACKED WITH A 25 YEAR
PAINT WARRANTY FOR
PEACE OF MIND**

FREIGHTING

We send freight across NZ & worldwide at reasonable prices.

HANDLING

Framing can be carried around the site by 1 or 2 men in a lot of instances.

LIFTING

Rafters and frames can be lifted into place using smaller equipment - e.g. telehandler, scissor lifts or smaller cranes. Less equipment, less hire time.

POSITIONING

Lighter framing members are easier to get in place for attaching.

FULLY GALVANISED

All framing is fully galvanized steel finish, requiring no painting on-site (unless extreme conditions).

HIGH TENSILE STEEL

Lighter gauge members, but superior strength with high-grade tensile steel.

FASTENING/CONNECTION

Our unique plate connection has had 100% success rate and no failures. Plates are pre-drilled for accuracy. 1-tonne sheer strength per TEK screw.

PRICE

Our patented profiles give greater strength using less steel. Maximise quality & minimise price.
