FormsteelTM

WORLD CLASS STEEL BUILDINGS SINCE 1972

SPEED BUILD

SPEED BUILD PRE-APPROVED PLANS MEANS LESS RED TAPE & LESS BULL

Plan and navigate your project successfully & quickly with SPEEDBUILD - A stunning range of Pre-Engineered premium grade building designs, saving you time and money. Suitable for a wide range of commercial, agricultural or lifestyle projects, our pre-engineered range is a step up from the average kitset. Built tough & durable to withstand NZ weather conditions since 1972.

SPEED BUILD By Formsteel™

FORMSTEEL BUILDINGS ARE ENGINEERED TO WITHSTAND ALL NZ WEATHER CONDITIONS

PRE-ENGINEERED SAVING YOU TIME
60 MODELS TO CHOOSE FROM
EASY TO ERECT & EASY TO READ CONSTRUCTION PLANS
PREMIUM GRADE MATERIALS & BUILT TO LAST
LESS CARBON FOOTPRINT THAN STRUCTURAL STEEL

SPEEDBUILD has been engineered to withstand all NZ weather conditions. From icy cold rain to strong winds, our high-quality steel buildings and shelters are designed to stand the test of time. For every kit-set we supply, we include easy to read construction plans and a PS1, which saves you time and money.

SPEEDBUILD components are fabricated to exact dimensions for easy assembly. The main structure can be erected within hours. Usually, no on-site measuring or cutting required. From a builder perspective, that means your time is spent on construction rather than cutting parts to

fit. We understand time is money, so it also allows follow-on trades to get to their part sooner. Depending on your building requirements and the size of your property, we're here to help you get it done, without the hassle of normal building consent processes. Further, customise from our range of cladding and colour options, or increase the functionality by adding extra design components.

Choose Formsteel and get the innovation you deserve throughout the entire design and construction process, backed up with leading warranties. For the right advice, expertise, design and construction knowledge for steel structures beyond the ordinary, talk to us.
